Development of Options is a Process

Many iterations for each option have been investigated

Site Analysis To Inform Options

// Initial Design Intentions:

/ Most efficient solar orientation
for classroom wings and entry

- Occupant thermal comfort
- Reduces HVAC loads

/ Maintain visibility to point of
access for security, students,
staff, parents, and visitors

/ Avoid restricted wetland areas
and buffers (unless previously
developed)

// Initial site concepts strive to minimally disrupt existing Town fields

- Construction activity may
have some impact

// Identifies area of the rear field, between the existing building and wetlands as primary buildable area

New // Concept Diagrams

orientation for
